## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION: SUBSTITUTE RESTRICTION/ELECTION**

**The Restriction/Election Requirement dated 6/23/05 is hereby WITHDRAWN in view of the Preliminary Amendment dated 7/26/02.**

**A new Restriction/Election Requirement follows.**

**Status of the Claims**

Claims 1-22 are currently pending as submitted in the international application WO 01/12846 to which 371 priority is made and as amended by the Preliminary Amendment dated 7/26/02.

IN response to this action applicant must present a proper claim set indicating all presently pending claims.

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13 and 20, drawn to a method of removing non-loaded amino groups and loading biomolecules onto metal oxide supports, classified in class 435, subclass 810.

Group II, claim(s) 14-19 and 21-22, drawn to a composition comprising a biomolecule attached to a metal oxide support and a kit, classified in class 536, subclass 23.1.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: activated metal oxide supports with attached

Art Unit: 1639

biomolecules is known in the art . See WO 99/02266 A and EP 0391608A. Thus Groups I-III lack a linking special technical feature.

***Election of Species:*** Groups I and II:

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. species of amine containing silanating agent (e.g.see claim 7) (GP 1 AND 2);
- b. species of biomolecule (e.g. see specification list enumerated on page 6) (GP 1 AND 2).
- c. species of “detection means” (e.g. new claim 22: GROUP 2 ONLY)

A search of each member of the above a-c. species categories would require and undue search in bibliographic patent and literature databases and/or additionally an undue examination burden since a reference directed to one species embodiment may not be applicable to a different species embodiment.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for EACH ITEM (as appropriate) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 2 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1639

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
